Julie, I resent your attitude very much using the word BLACKMAILED. People in the drug lab have made every effort to help with the renovations in the Drug Lab. If you can't see how offering 4 hours of COMP time on a summer Saturday when it takes an hour to get in and get home is ridiculous, then one of us is not being realistic. I will show you how to set the alarms Friday. CBS

The work must get done on Saturday in order to install the damper. It is the only way to modulate the temperatures in the laboratory. It is pretty disappointing that no one is willing to come in for this and I will not be blackmailed into providing additional comp time simply because someone doesn't want to come in for just 4 hours.

If no one else will come in, I will - so as to assure the work is completed on schedule and the chemists have a comfortable environment in which to work. Please review the alarm process with me tomorrow.
Thanks, Julie

Hi Julie, I looked at your notice on the Coverdell visit and mistakenly thought that they were coming August 16, the assessment date. I didn't realize that it was next Tuesday. Hevis can go down the renovated lab that day and we can set her up there if she has to demonstrate any sample work. Della and Daniela are already setting up shop in Della's Lab. Also, I asked and no one is interested in coming in Saturday for 4 hours comp time. CBS

Hi Hevis,
All good questions; this is our first site visit from MSP on the grant, so I don't have a lot of specific information on what they will expect from you. You should be working on samples and they would probably just like to meet you & possibly ask a few questions about your background. I have provided them with a copy of your resume. I would prefer that you be in the renovated space, as we all know appearances do matter.

Chuck – I will follow-up w/ maint. On moving back into the space.

Julie

Subject: Coverdell Grant Visit

Hello Juli,

I am emailing regarding the Coverdell Grant visit this coming Tuesday. You had mentioned that they would like to meet with me, in addition to discussing the financials and take a tour of the laboratory. I would like to know what will they be expecting of me as a new employee? Would I be doing samples at the time of the visit, or simply meet with them and discuss my position? I am a bit unclear as to whether I should be staying at Chuck's lab where I am currently working on samples, or move down to the already renovated lab for that particular visit?

Please let me know what is expected of me for during the visit, and I will start making the necessary adjustments.

Thank you and have a great day,

Hevis
